CHAPTER 1. INTRODUCTION

Each Infrastructure Manager (IM) and – if applicable – Allocation Body (AB) of a corridor publishes its Network Statement (NS) for each timetable year on its website.

Atlantic Corridor Specificities	
<i>Links to the NSs of the IMs involved in the Atlantic Corridor as follow:</i>	
	http://fahrweg.dbnetze.com/fahrweg-en/customers/network_statement/network_statement/network_statement/
	http://www.sncf-reseau.fr/en/network-statement-of-the-national-rail-network
	http://www.adif.es/en_US/conoceradif/declaracion_de_la_red.shtml
	http://www.infraestruturasdeportugal.pt/rede/ferroviaria/diretorio-da-rede

Direct links to the NSs can also be found in the first row of the table in Chapter 3.

CHAPTER 2. OBJECTIVE

The aim of CID Book 2 is to give easy access to all NSs of the IMs/ABs involved in the Atlantic Corridor in line with Article 18 of the Regulation.

CHAPTER 3. LEGAL FRAMEWORK

The NS of each country is based on international law and European Union (regulations and directives) and in the laws of each country and specific regulations of each IM.

For more information, see section 1.3 of each NS 

CHAPTER 4. LEGAL STATUS

4.1 GENERAL REMARKS

The contents of the NS must be followed by the RU that uses the Rail Network, especially regarding the technical conditions of the operations and their restrictions, capacity allocation and pricing.

In the event of any material differences between the NS and legislation currently in force, the latter prevails.

4.2 LIABILITY

Each NS contains a description of the basic elements of the German, French, Spanish and Portuguese national rail network and its use, at the date of its publication.

Railway undertakings are invited to consult DB Netz AG, SNCF Réseau, ADIF and IP for further details, especially concerning any changes in the infrastructure of the national rail network occurring between the publication of the NS and the period to which it applies.

DB Netz AG, SNCF RÉSEAU, ADIF and IP also invite the reader to report any errors found in this document which shall be corrected at the earliest opportunity.

In addition, DB Netz AG, SNCF RÉSEAU, ADIF and IP are not responsible for the content of the websites referred to in this document, the responsibility of these publications lies with the authors. If DB Netz AG, SNCF RÉSEAU, ADIF or IP are informed of any rights violations regarding these websites, they will proceed to delete the links of the websites in question.

For more information, see section 1.4.2 of NS, 

For more information, see section 1.4.1 of NS, 

For more information, see section 1.4.1 and 1.4.2 of NS, 

For more information, see section 1.4.2 of NS. 

4.3 APPEALS PROCEDURE

In accordance with the Transport Code, appeals may be lodged with the Bundesnetzagentur (BNetzA) in Germany, Autorité de Régulation des Activités Ferroviaires (ARAF) in France, Comité de Regulación Ferroviaria (CRF) in Spain, and Autoridade da Mobilidade e dos Transportes (AMT) in Portugal, by those authorized to request railway infrastructure capacity, if they consider themselves to be the victims of unfair treatment, discrimination or any other prejudice connected with access to the rail network, in particular in relation to the provisions set out in NS.

For more information, see section 1.4.3 of NS, 

For more information, see section 1.4.2 of NS, 

For more information, see section 1.4.1 and 1.4.2 of NS, 

For more information, see section 1.4.3 of NS. 

CHAPTER 5. STRUCTURE OF THE NS EXCERPT

In order to facilitate the consultation of the NSs for the applicants, an overview of the NS per IM/AB involved in the Corridor and per chapter and sub-chapter is provided in a harmonised table used by all corridors. The structure of the table corresponds to the RNE Network Statement Common Structure. This table includes links that lead to the English versions of the IMs'/ABs' NSs or if not yet available temporarily to the national language version until the English version is available.

All the NSs and the NS excerpts published in this Book comprehend the main chapters 1-6, each containing a table with the following information:

1. General information
2. Access conditions
3. Infrastructure
4. Capacity allocation
5. Services
6. Charges

Information related with the structure of each IM NS was introduced according to the legend below:

Legend	
✓	Content exists (direct link to relevant chapter is optional)
x	Content does not exist
5.3.5	Content exists in this other chapter of the IM NS (direct link to relevant chapter is optional)

Note

If the content exists but in a different chapter, then insert the number of the actual IM NS chapter.

In the special case of chapters 5.3.2.2, 5.4.4 and 5.5.6, which correspond to all other service categories that are not standard, include all the applicable chapter numbers.

If an IM's NS includes additional chapters, it can add this information as a table footnote in order to provide a complete overview of its NS.

The last date of update is the last date when the IM concerned updated the information in the table.

The capacity allocation process for Atlantic Corridor is described in Book 4 of this CID.

For all other types of international capacity requests, the national NSs shall be consulted. For more information, please see Chapter 4 on Capacity Allocation in each NS.

For all other international types of capacity requests, the national NS should be consulted.

For more information, see Chapter 4 of each NS.
