

ATLANTIC
CORRIDOR

20TH TAG-RAG MEETING

Videoconference, March 3rd 2021

INDEX

1. WELCOME AND UPDATE/NEWS ON ATLANTIC CORRIDOR
2. RESERVE CAPACITY FOR 2021 AND CAPACITY OFFER FOR 2022
3. KEY PERFORMANCES INDICATORS 2020
4. USERS SATISFACTION SURVEY RESULTS 2020
5. TRAIN PERFORMANCE MANAGEMENT: PUNCTUALITY ANALYSIS ON FOCUS TRAIN VIA TIS
6. INTEROPERABILITY WORKING GROUP : QUALITY CIRCLE OPERATION ON BORDER POINTS
7. MAIN RESULTS OF THE TRANSPORT MARKET STUDIES
8. ACTIONS AND STUDIES FORECASTED IN THE NEXT EU FUNDING PERIOD
9. AOB

A blurred photograph of a freight train in motion, with several brown and orange freight cars visible. The train is moving from left to right, creating a sense of speed. The background is slightly out of focus, showing some industrial structures and a cloudy sky. There are three decorative horizontal bars: a blue one at the top, a purple one below it, and a green one at the bottom right.

1. WELCOME AND UPDATE / NEWS ON ATLANTIC CORRIDOR

NEWS

- Corridor Information Document 2022
- Customer Information Platform: available rerouting itineraries in case of traffic disruption,
- Studies/actions on progress in 2021
- TCM further development expected at short term

CORRIDOR INFORMATION DOCUMENT 2022

- **CID TT2022 is one single Document** with 1 to 4 sections, duly simplified and harmonized, replacing the homonymous books.
- **Book 5 with the Implementation Plan is still an independent document** with harmonize list of contents
- **New digitalization tool** for CID and NS – NCI – going online by end of April 2021, where TT2021 and TT2022 for all RFCs may be accessed

EUROPEAN REGULATION 913/2010
Rail Freight Corridor "Atlantic"

ICM Re-routing Options | Route Planning

1 : 6933487

Legend

Re-routing Options:

- Expected RFC Lines

Terminals

- Nodes
 - Railway Node or Junction
 - Border Point
 - Handover Point
 - Expected Node

Instructions

Step 1: Select one of the red ICM lines by clicking on it. The re-routing options for this ICM line will be displayed in green. For dashed ICM lines no re-routing options are available.

Step 2: Select one of the re-routing lines. A pop-up window with the characteristics of the whole re-routing line and of the specific segment will appear. In case of overlapping re-routing lines, one tab will be available for each line.

Step 3: To leave the "ICM Re-routing options" view, click on the ICM Re-routing Options button.

Note: The visualisation of ICM Re-routing options is work in progress. For the complete list of ICM Re-routing options of individual RFCs, please refer to the

Re-routing Line	Node	Value
ICM_LINE_NAME	Badajoz / Elvas (PT/SP border) - Abrantes	
RE_ROUTING_LINE_NAME	Medina del Campo - Salamanca - Fuentes de Oñoro - / Villar Fromoso (PT/SP border) - Pampilhosa - Abrantes	
TRACK_LENGTH		555,84 km
IM		ADIF; Infraestruturas de Portugal
COUNTRY		Portugal; Spain
USAGE		Passenger & Freight
NUMBER_OF_TRACKS		One
LINE_CATEGORY		D4
TRACTION_POWER		not electrified; 25 KV AC
SIGNALLING		upon request; ASFA; EBICAB (700)
SIGNALLING_GROUP		upon request; Class B-System (Legacy)
TRAIN_LENGTH		< 300 m; 500 - 549 m
SPEED		81 - 100 km/h; 101 - 120 km/h
INTERMODAL_FREIGHT_...		upon request
INTEROPERABLE_GAUGE		upon request; PTB+; GHE16
MULTINATIONAL_GAUGE		upon request; PTB+; GHE16
GRADIENT_DIR_1		15 - 20
GRADIENT_DIR_2		15 - 20
MISCELLANEOUS		Iberian track gauge: 1668mm

1. By clicking on a selected ICM-Line, possible Re-routing Lines will be displayed on the map.

2. By clicking on a Re-routing Line, a Pop-Up window will show more detailed information

A New RNE task force has been created in order to use the SFs information in CIP to complete the SFP. Afterwards CIP the IMs will complete the information on the SF they operate. As only a SF manager is able to edit its own information in the SFP, we suggest to the SF managers present in the TAG, to login and complete their relevant information <https://railfacilitiesportal.eu/signup> IT IS FREE!!

STUDIES / ACTIONS ON PROGRESS FOR 2020

❑ **Intermodal rail freight gauge classification on the Iberian Peninsula**

- Due to COVID pandemic situation, the gauge measurement has been canceled. Some gauge measurement results coming from ADIF would be used for rail freight gauge classification in Spain.

❑ **Transport Market Study update**

- Contract signed at the end of June 2019, some extensions and BREXIT impact have been checked in Spain and France,
- Final report expected at the end of March 2021.

❑ **ERTMS deployment on the cross-border Vitoria Bordeaux study:**

- European call for applicants will be launched at the beginning of March, studies are planned from May to December 2020.

❑ **Language pilot at the French/German border**

- With RNE support, SNCF Réseau and DB Netz AG are working on a pilot in order to improve the communication in French between IM and RU at Forbach station.
- Driver derogation for German language speaking at Forbach is extended to the end of 2022.

TAF-TSI TCM INFORMATION IN TIS

PSA funding has been dedicated to the Atlantic Corridor in order to implement these new functionalities between national system of each IM/RU and TIS until the end of 2020.

RNE and IP developed new IT interfaces in order to automatically provide the TAF-TSI TCM information in TIS for Portuguese RUs using TIS.

A display field with the required TAF-TSI information regarding TCM to be provided by RUs is already deployed and visible in TIS.

TCM ATLANTIC CORRIDOR PILOTS – RECENT DEVELOPMENT

Real time information about train composition:

- Beginning of 2021, deployed the TAF-TSI TCM fields in TIS for Pilots sponsored by RNE
- IP Pilot currently receiving TAF-TSI TCM information from the both PT freight RUs – TAKARGO and MEDWAY
- ADIF will check with RENFE Mercancias for the same development.

PAP OFFER TT-2022

- ❑ 32 PaP/Slots in **Germany**, 7 days/week
- ❑ 36 PaP/Slots in **France**, 5-7 days/week
- ❑ 20 PaP/Slots in **Spain**, 4-7 days/week
- ❑ 10 PaP in **Portugal**, 2-4 days/week

DISTANCE BETWEEN
500 KM & 2300 KM

20 Multicorridor PaPs
connecting
Germany, France, Belgium
and Spain by
RFC2, RFC4 & RFC6

ATLANTIC PILOT – PILOT INFORMATION DOCUMENT DELIVERABLE

Base concepts have been shared through “Pilot Information Document”

- A capacity band is the favorite timing to attribute long distance trains paths
- A specific capacity has been safeguarded (system paths) for these traffics
- Eligibility criteria have been defined

Next steps :

- On April 15, a task force IMs+RFC will consider all eligible received requests together
- The support paths will be distributed to the most relevant requests (+ feeder outflow when necessary)
- Priority criteria have been defined in case of scarcity
- Unused support paths will be deleted except one per direction
- This remaining support path will be the bone for rolling planning, using PCS to monitor its day-by-day availability and the requests/answers.

TTR pilot PID ATL – Mannheim – Miranda de Ebro

Pilot Information Document Procedures for Capacity Requests

valid for process of timetable 2021,
starting in 15 Dec 2019

Pilot Information Document has been published within TTR ATLANTIC Pilot CMS (*within RNE*)

TTR PILOT MANNHEIM - HENDAYE/IRUN – MIRANDA DE EBRO FOR TT2022

- ❑ ADIF, SNCF Réseau and DB Netz jointly supported by RFC ATL prepared for TT2021 a redesigned capacity offer for international freight trains mixing two products:
 - a new product, available for path requests between Metz / Mannheim area and Bayonne / Hendaye area & Irun to Miranda de Ebro, in the form of available slots within capacity bandwidths, called **“Guaranteed Capacity” (GC)** for annual requests and for Rolling Planning;
 - a traditional product, available for all other international path requests, in the form of **Flex-PaPs (for all IMs in the Corridor)**.
- ❑ The approach is **consistent with** the upcoming implementation of **TTR concepts** and processes.
- ❑ **Publication in PCS** of the “TTR Pilot Capacity” has been done **as “traditional Flex PaPs** as “*virtual paths*” represented by bandwidths.
- ❑ Pilot Information Document will be available with further details.

TTR PILOT MIRANDA DE EBRO – IRUN/HENDAYE – MANNHEIM FOR TT2022

- ❑ As for traditional PaPs, the paths requested inside the capacity bandwidths will be taken into account by the IMs during the Path elaboration phase **according to the detailed requests placed in PCS or the national system (for national requests)**. If RUs place requests respecting the features of the capacity bandwidths, they should expect to receive an **offer as close as possible to the wished timetable**.
- ❑ A task force between involved IMs and C-OSS **will coordinate the use of the safeguarded capacity according to the full received requests (national and international)**, in order to provide an answer to the customers in due time.
- ❑ In case of higher number of requests than the dedicated safeguarded capacity offer, **the priority will be given to the requests having the highest product length of journey * number of days** (same rule than for conflicting PaP requests).

A blurred background image of a train on tracks, with a white rectangular area in the center containing text. The image is decorated with a blue bar at the top, a purple bar on the left, and a green bar at the bottom right.

3. KEY PERFORMANCES INDICATORS 2020

KEY PERFORMANCES INDICATORS CAPACITY OFFER EVOLUTION

Minor decrease in Germany because for TT-2021 the Rolling Planning capacity was included in this KPI in Jan-21 and not for TT-2022. RP Capacity would be published in August 2021.

TRAFFIC KEY PERFORMANCES INDICATORS 2020

Additional analysis for the international rail traffic SP/DE evolution 2016-2020

- Different figures have been observed in the past years for the international traffic crossing France.
 - For the traffic connecting the western part of Spain, **8% of decrease** have been registered
 - For the traffic connecting the eastern part of Spain, **58% of increase** have been registered
- with the same penalties** affecting the international traffic (strikes, COVID, etc.)

Additional analysis on the capacity offer evolution 2016-2020 :

For this period, the long distance traffic **capacity offer evolution** :

- **16% of decrease** have been registered at Hendaye,
- **19% of increase** have been registered at Forbach,

Higher capacity offer for the eastern part of Spain = less TCR affecting the FR Network via Lyon ?, more dynamic rail market linked to UIC connection to Barcelona ? **and, by the way, more yearly traffic...**

4. USERS SATISFACTION SURVEY RESULTS 2020

USER SATISFACTION SURVEY 2020

	Overall respondents		Overall evaluations

the answer
'generally satisfied'

USER SATISFACTION SURVEY 2020 SUMMARY- TOP 10 FOCUS TOPICS

- » Top 10 of focus topics chosen
- » Answered by: RUs/non-RUs, Terminals/Ports
- » Different sample sizes on every topic (answered by RUs&Terminals 6, answered by RUs only 5)

3 Most important topics

1. Infrastructure parameters
2. TPM – RU/terminal involvement
3. Measures to improve infrastructure standards

A blurred photograph of a freight train in motion, with several brown and orange freight cars visible. The background is out of focus, showing a hazy sky and some structures. The text is overlaid on a white rectangular area in the center-right of the image.

**5. TRAIN PERFORMANCE
MANAGEMENT:
PUNCTUALITY ANALYSIS ON
FOCUS TRAIN VIA TIS**

ONGOING BI-LATERAL WORKING GROUPS

Definition of bilateral Working Groups

Atlantic TPM West Group

Catch up call

IP / ADIF TPM representatives

Task: review OBI and IM reports and traffic flows between Portugal and Spain

Regular contacts

a) Medway

Task: Analysis of systematically delayed trains, analysis of the causes and search for solutions to improve performance

Atlantic TPM Center Group

Rus
(tbd)

RUs
(tbd)

*Input from East and West
bilateral groups*

Atlantic TPM East Group

Monthly catch up call

SNCF R / DB Netz TPM representatives

Task: review RFC4 and IM reports and follow up on RU feedback

Quarterly phone conference (1h each)

a) SNCF Fret/ DB Cargo

b) SNCF Fret / Captrain Allemagne

c) SNCF Fret /Rhenus Logistic

d) ECR / DB Cargo

Task: Review „sick trains“ and focus trains

TPM RESULTS 2020

Amount and distribution of delays over period of 13 months

West-East

East-West

RNE TPM WG – RESULTS 2020

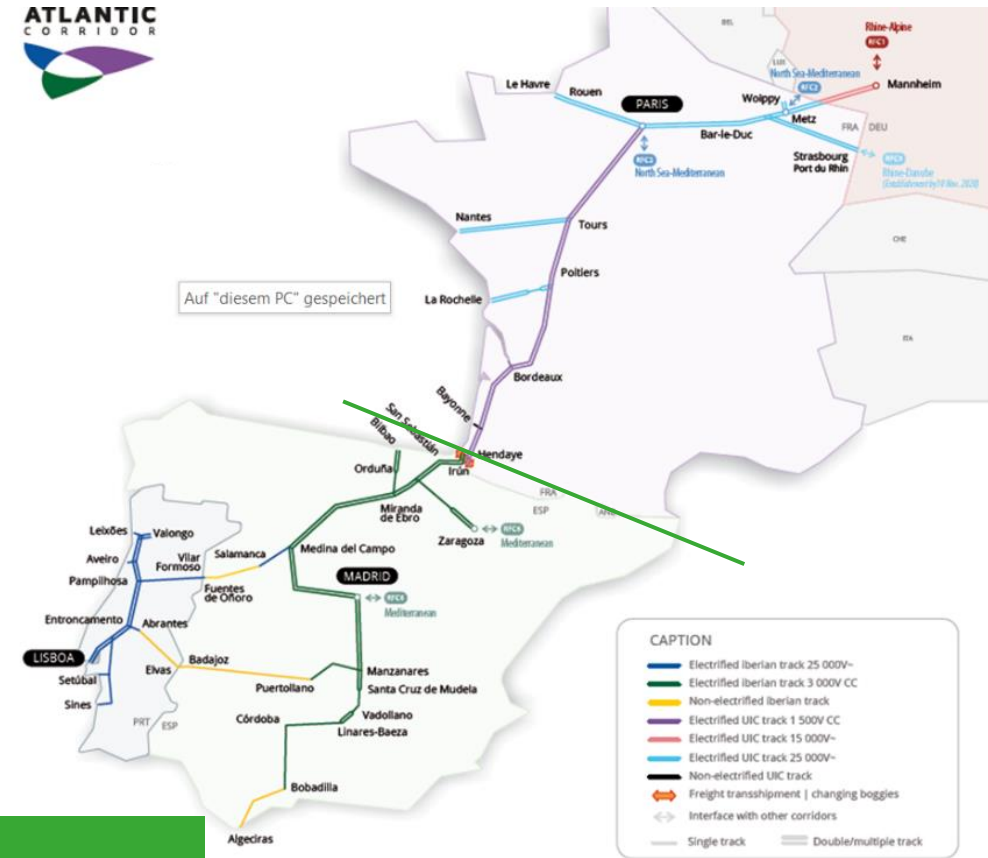

Atlantic TPM
East Group

□ RNE PM WG

- Performance management in Border section areas
- Data Quality in the border section areas in TIS, including connections between trains
- Monitoring and contributing to the development of reports in OBI
- Monitoring of dwell times in the border section areas and creation of support reports

□ RNE KPI WG

- Contribution to the definition of KPIs and respective reports
- Monitoring period applied for KPI calculation

Atlantic TPM
West Group

TPM WORKGROUP 2021 GOALS

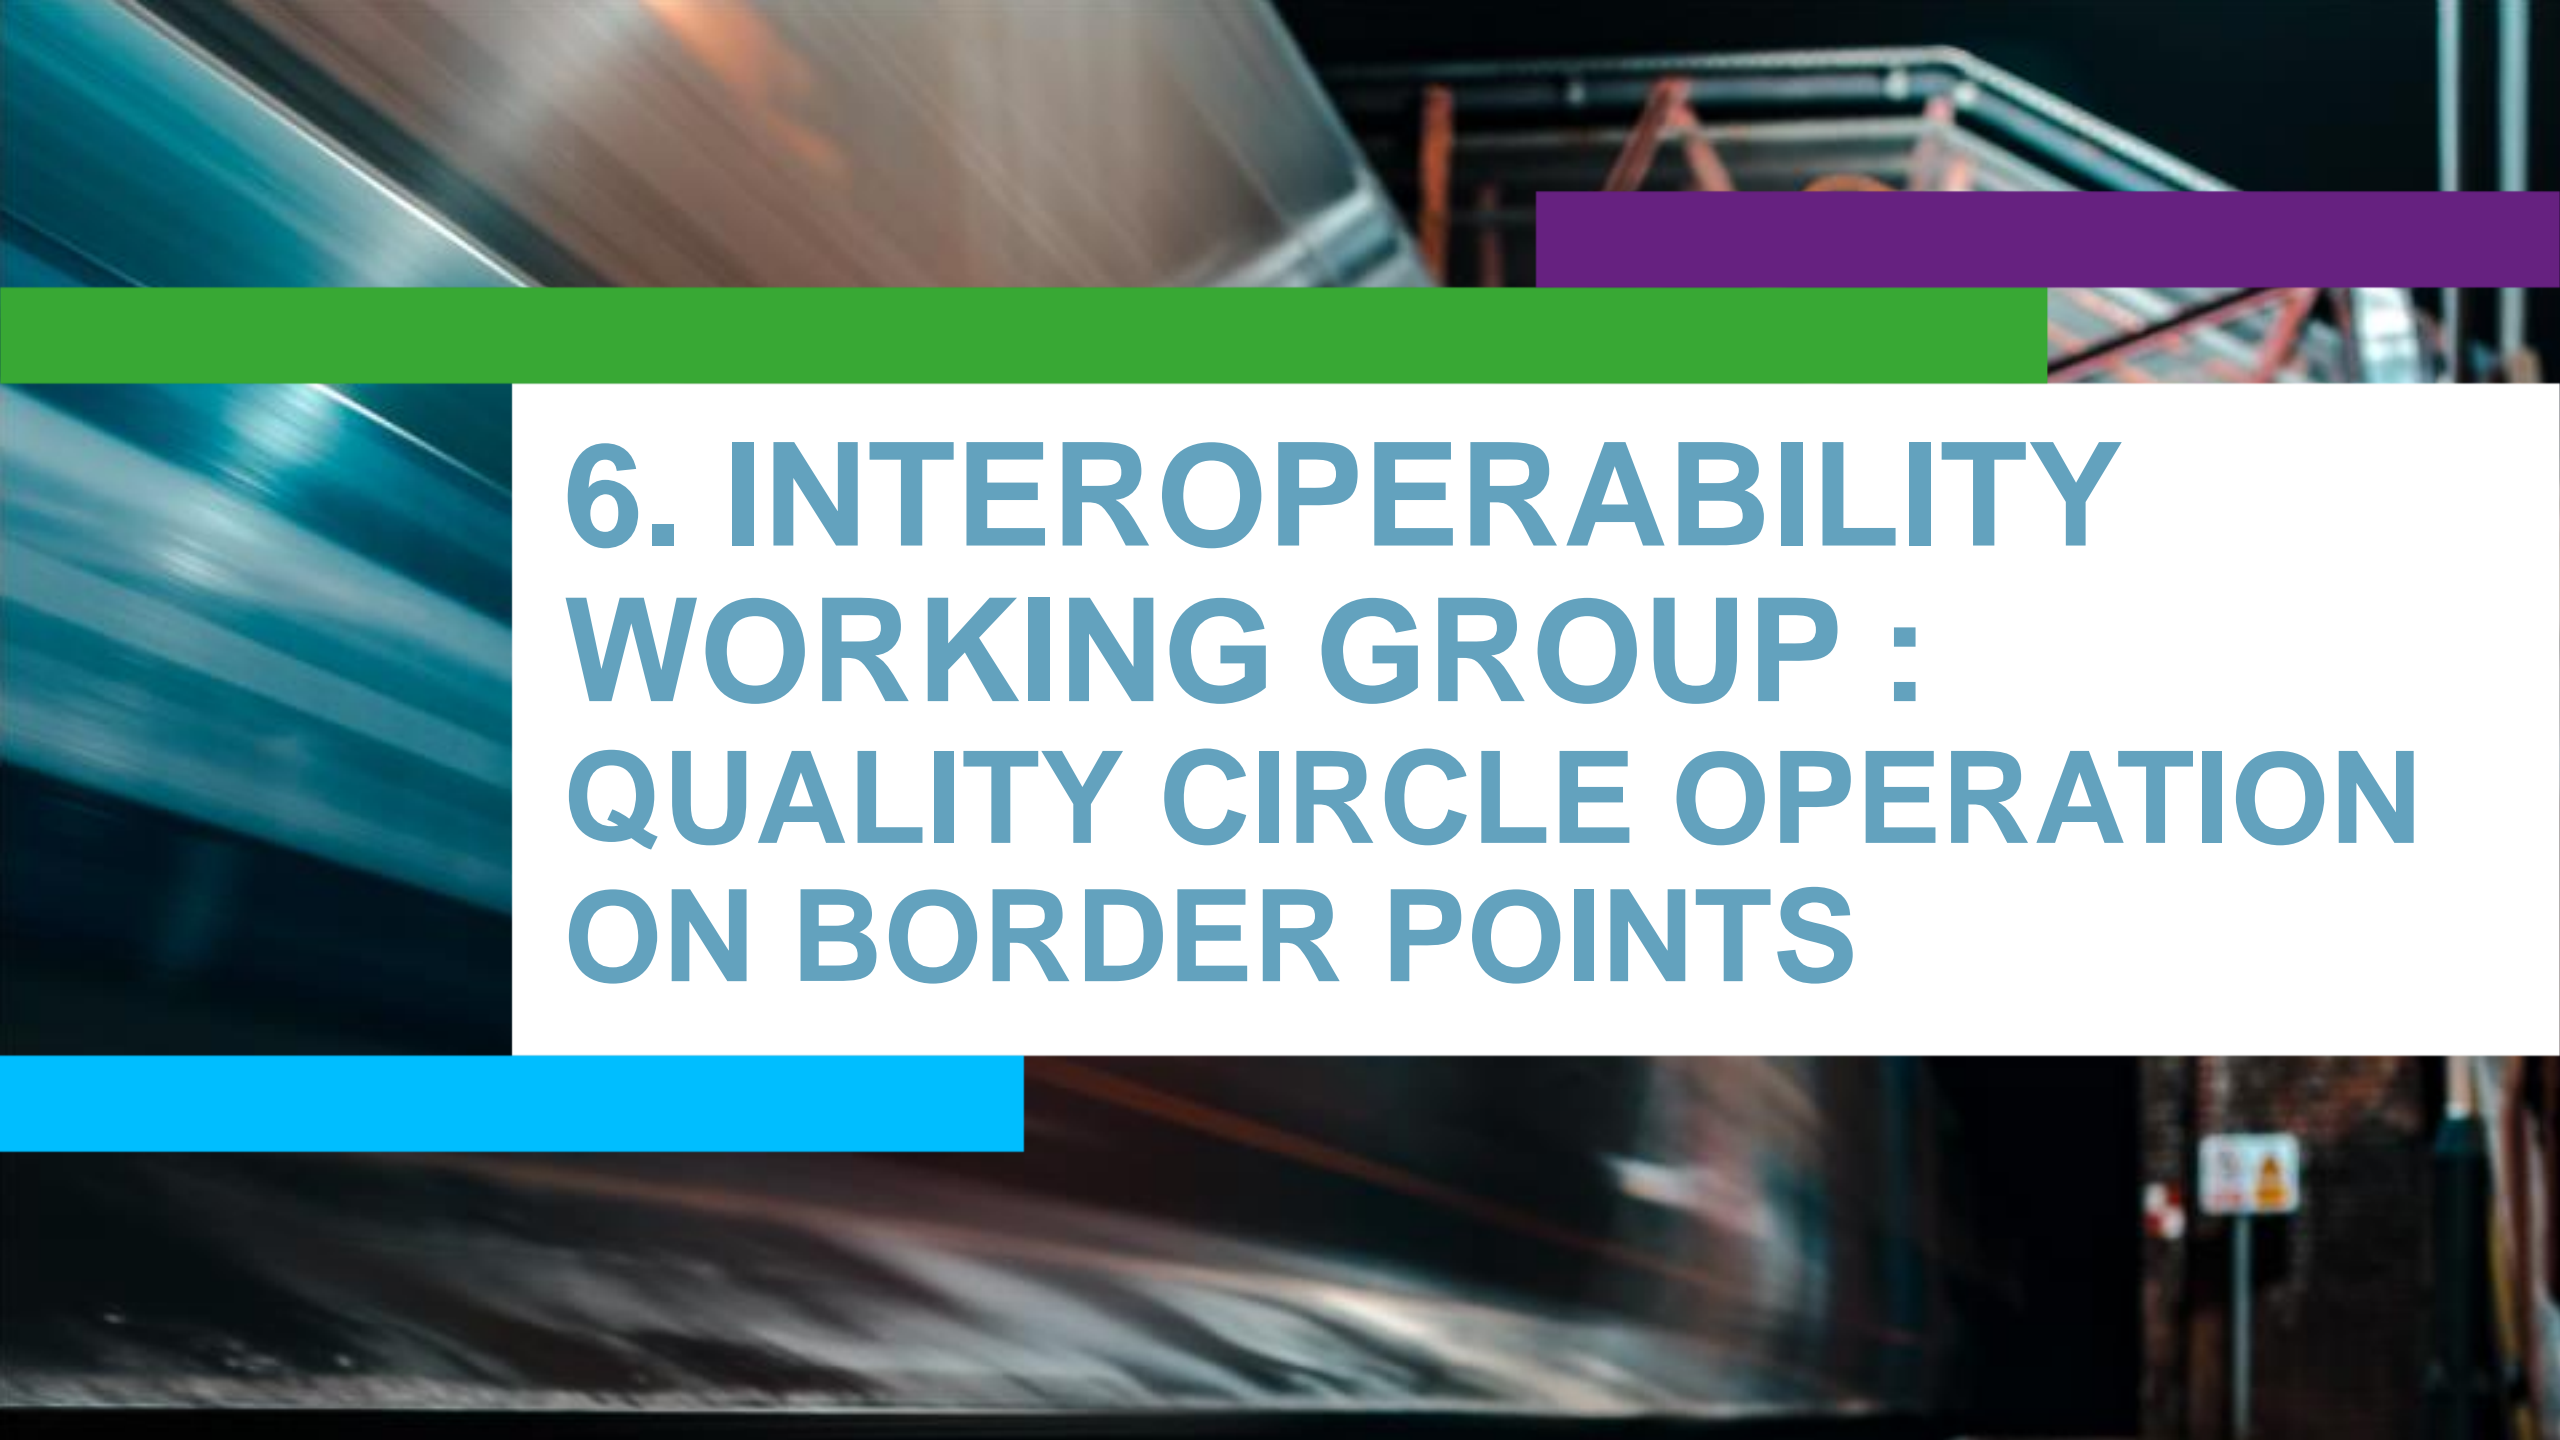

Expected results by 31st of December

1. Intensify relations with the RUs and include their focus trains into the analysis:
 - East Group: continue quarterly meetings
 - West Group: Start regular meetings with Medway and Renfe Mercancias
2. Publish TPM reports based on the information from TIS (OBI), according to RNE guidelines
3. Develop new reports based on the output of the RNE's DQ WG to reflect the results of the 2 subgroups:
 - DE-FR-ES
 - ES-PT
4. Develop Dwell Time reports at Borders to provide to QCO by the end of 2021
5. Support the MB with the necessary TPM data to enable informed decisions by the MB

TPM WORKGROUP 2021 ACTIONS

1. Improve train Monitoring:
 - a) DE-FR-ES and comprehensive RU relations for long distance traffic (mainly automotive)
 - b) Spanish-Portuguese Traffic
2. SNCF R should guarantee the adequate involvement in the development of the TIS reports using OBI
3. Invite Transfesa to join Linking Trains project with ECR and DB Cargo (TIS / RNE visibility of traffic Flows)
4. Cooperate with RNE in the DQ WGs related to border reporting and dwelling times at the border sections (TIS DQ and reporting)
5. Promote closer coordination between the TPM working group and the MB (including RAG/TAG support)

**6. INTEROPERABILITY
WORKING GROUP :
QUALITY CIRCLE OPERATION
ON BORDER POINTS**

QUALITY CIRCLE OPERATION FORBACH / SAARBRÜCKEN

- ❑ RFC Atlantic provides a platform to discuss with IMs and RUs operational cross border problems
- ❑ Meeting history:
 - ❑ 09/2019: Workshop with focus on on Forbach
 - ❑ 08/2020: Online workshop with focus on Saarbrücken
 - ❑ 02/2021: Start of the Continuous improvement process
- ❑ Regularly more than 30 participants from SNCF Logistic, EUROCARGORAIL, CFL Cargo, DB Cargo, Rhenus Rail, SNCF Réseau, DB Netz and RFC Atlantic
- ❑ Very positive spirit by the participants to improve collaboration for better cross-border performance of rail

Quality Circle Operation | Christian MINGE, Jacques COHEN | 25.01.2021

QUALITY CIRCLE OPERATION FORBACH / SAARBRUCKEN: PROJECTS AND RESULTS

1. Extension of the pilot of the DB Netz/SNCF Réseau timetable departments: from train number harmonisation in 2020 to operational **train path coordination of ad-hoc timetables** via chat translation tool **Assistify** in 2021
2. Extension of the **TIS Train Linking Pilot** to other RUs (SNCF Fret, Captrain, CLF Cargo) with the aim of improving international real-time information in TIS
3. Working group to optimize **the loco driver change** in Forbach for the direction FR to DE
4. **Exceptional transports Process**: IM/RU are satisfied with the results in 2020. DB Netz will on top pilot a fallback level on the weekend via shift workers
5. Evaluation of the RU proposals within the **UIC X-Border project "Concept for an ideal border section"**

TRAINS ARE LINKED IN TIS AUTOMATICALLY BASED ON THE TRAIN COMPOSITION MESSAGE (TCM). THIS GENERATES MANY ADVANTAGES FOR RUS AND IMS

ON THE 1ST OF DECEMBER 2020, THE FIRST DB CARGO GROUP TRAIN WAS LINKED AUTOMATICALLY IN TIS. STILL SOME WORK TO DO BUT WE ARE ON TRACK!

EVALUATION OF THE RU PROPOSALS WITHIN THE UIC X-BORDER PROJECT "CONCEPT FOR AN IDEAL BORDER SECTION". DEDICATED MEETING PLANNED FOR 11TH OF MARCH 2021

Extension of the cross border section to a cross border area

Switchable voltage DE/FR in Forbach

Run trains with min 740 m length

UIC X-Border

A blurred background image of a freight train moving through a station or yard. The train consists of several brown and orange freight cars. The image is overlaid with a white rectangular area containing text. Above the white area is a blue horizontal bar, and below it is a purple horizontal bar. At the bottom right of the white area, there is a green horizontal bar.

7. MAIN RESULTS OF THE TRANSPORT MARKET STUDIES

8.

**ACTIONS AND STUDIES
FORECASTED IN THE NEXT EU
FUNDING PERIOD**

FOR RAILWAYS, THE FOLLOWING ACTIONS WILL BE SUPPORTED BY EU FUNDING

- construction/upgrading of cross-border and missing links;
- **capacity and performance upgrade of existing lines**, including removal of level-crossings and **upgrades necessary for 740 meters long trains**;
- **capacity increase in nodes**, including as regards a better articulation of long-distance and local traffic;
- **interconnections between rail and other modes of transport**, in particular inland waterway and maritime transport and actions aimed at the integration of the rail and air networks to make the feeder network for long-haul flights more sustainable. Actions located exclusively within the perimeter of inland ports and maritime ports shall be submitted under those priorities respectively;
- **connections of freight terminals to the Core Network**;
- **electrification of line tracks and upgrade of electrification systems**.
- Support will not be given to railway stations, except for railway infrastructure components. If the Action includes such components, they shall be presented as a separate work package. Neither shall support be given to activities related to the Class B systems. Actions shall comply with the provisions of Directive 2016/797 on the interoperability of the rail system and with the related Technical Specifications for Interoperability. **Where relevant, Actions shall also be compatible with the alignment of operating procedures across borders in order to ensure the most effective use of the supported infrastructure.**

FOR ROADS, RAIL-ROAD TERMINALS AND MULTIMODAL LOGISTICS PLATFORMS, THE FOLLOWING ACTIONS WILL BE SUPPORTED BY EU FUNDING :

- pre-identified road links as stipulated in Section 1 and 2 of Part III of the Annex of the CEF Regulation, in particular cross-border links and missing links on the Core Network;
- components of the Core and Comprehensive road Networks located in Member States which do not have a land border with another Member State as stipulated in the Section 3 of Part III of the Annex of the CEF Regulation;
- improving road connections to maritime and inland ports and rail-road terminals if this contributes to less congestion in urban areas or is necessary for the expansion of the capacity of the ports and rail-road terminals;
- **construction or upgrade of rail-road terminals** as defined in Annex II of Regulation (EU) No 1315/2013, combined transport transshipment points and other publicly accessible multimodal logistics platforms located in nodes of the TEN-T Network, **including connecting or siding tracks, power connections**, safe and secure truck waiting areas, **adaptations for 740 m train length**, clean transshipment equipment for intermodal loading units, **including specific equipment for rolling motorways and the transportation of semi-trailers by rail**, and ICT equipment and applications.
- Support will not be given to buildings, storage and warehouse facilities.

A blurred background image of a freight train moving through a station or yard. The train consists of several brown and orange freight cars. The image is overlaid with a white rectangular area containing text. Above the white area is a blue horizontal bar, and below it is a purple horizontal bar.
