## CHAPTER 1 INTRODUCTION

---

One of the objectives of Rail Freight Corridor «Atlantic» is to facilitate the Railway Companies and Candidates with assigned capacity, the information of the whole facilities of Freight Terminals in order to keep developing the railway transport activity.

Along Rail Freight Corridor «Atlantic» a group of facilities are presented with different typologies. Characteristics and details of each of the railway networks will be exposed in part 3. These facilities can be of private or public ownership and in this last case (public ownership); management might have been licensed to a private company.

## CHAPTER 2 TERMINAL OVERVIEW

---

In order to provide homogenous and detailed information of the main aspects of the Freight Terminals along Rail Freight Corridor «Atlantic», a **specific card** for each technical facility has been prepared with the following content:

- **Location. Simplified Map signalling the location in Rail Freight Corridor N°4 «Atlantic».**
- **Terminal Type. General activity typology and ownership**
- **Contacts. Address, phone numbers, email**
- **Working Timetable. Timetables of managers implied are collected**
- **Services. Main services are exposed.**
- **Infrastructure. Track diagrams of each facility specifying electrification and remote control are as well exposed. The effective length of the track for trains separations.**

As it is shown on the map in annex 1, terminals network of Rail Freight Corridor «Atlantic» counts with a total of 57 units, distributed in the following way: Germany 8, France 18, Spain 16 and Portugal 15.

In Portugal, facilities of the main complex are divided in specialty areas and in their Railway Network Statements (NS), each one of these areas is named by the concept Freight Terminals.

As noted in part 1, there is a variety of Freight Terminals and specialized facilities along Rail Freight Corridor «Atlantic». From the information contained in the NS provided by the Infrastructure Managers and the specific analysis realized, we can provide the following comments of the descriptions of facilities in each one of the Railway Networks implied:

### 2.1 GERMANY (DB NETZ AG)

DB Netz AG does not operate any freight terminals. DB Netz operates and provides other services and service facilities, e.g. marshalling yards. Terminal facilities are offered by other operators.

On the German section of Atlantic Corridor there are a number of performant terminals in the area of Mannheim / Ludwigshafen. Furthermore there are a few smaller terminals in the area of Saarbrücken. Those Terminals can be subdivided in:

- **Combined Traffic Terminals (Railroad/road): KTL Ludwigshafen, Beckingen Puhl, Kirkel Terminal**
- **Port combined traffic terminals. (railroad/river road): MCT Mannheim**
- **Port combined traffic terminals. (railroad/river road/road): DUSS Mannheim, Contargo Mannheim, Contargo Ludwigshafen, DP World Germersheim**

For terminals on Atlantic Corridor see chapter 3.1.

## 2.2 FRANCE (SNCF RÉSEAU)

From the indications provided by SNCF Réseau, service terminals or those which are close to Rail Freight Corridor «Atlantic» in France, are distributed as follows:

- **Réseau Ferré National Combined Traffic Terminals (Railroads/roads)**

These combined traffic terminals, whose aim consist of securing a good intermodality railroad/road with specific infrastructures located in the terminal, belong to the Réseau Ferré de France and are exploited by private operators. It consists of: Hendaye, Bordeaux – Hourcade, Cognac, Saint-Pierre-des-Corps, Valenton, and Noisy-le-Sec.

- **Combined Traffic Terminals (Railroads/roads) located outside national railroad networks.**

There are also combined traffic terminals which are independent from the infrastructures managers.

In France, the European Freight Center (EFC) is the logistic platform located near Bayonne, which includes an intermodal railroad/road platform, as well as logistics warehouses.

- **Marshalling yards (Railroad/Railroad)**

Marshalling yards, which belong to the infrastructure managers, consist of a group of facilities that allow to marshal freight cars with the objective of creating or forming new trains. We also find a group of tracks that allow the exit and formation of new trains in gravity shunting.

In France, the technique used is gravity shunting; two gravity shunting can be found in service near the corridor: Le Bourget in Île-de-France and Woippy, North of Metz.

- **Port combined traffic terminals. (railroad/sea/road/river)**

The main maritime ports located in Rail Freight Corridor «Atlantic» have intermodal facilities located in the port railroad network. The main siding track links the railroad network that belongs to the national infrastructure managers to the port railroad. The facilities available in port terminals can also have connections between road and river transport.

In France, the following ports: Bayonne, Bordeaux – Bassens, La Rochelle, Nantes St Nazaire, Le Havre and Rouen (river port), benefit from the facilities mentioned and are located along Rail Freight Corridor N°4 «Atlantic».

- **Facilities that allow connections between UIC and Iberian networks (railroad-railroad)**

The connection between Iberian (Spanish and Portuguese) and French networks implies adapting the specific track gauge of the Iberian networks.

There are 2 technical connection for a railroad network with different gauges: on one hand there is an operation area for gauge change which is operated by a private company called Transfesa, in Hendaye, located in the French side of the border; on the other hand an operation area for transfer facilities in Irún (Spanish side)

### **2.3 SPAIN (ADIF)**

In the Spanish railway NS, terminals are generally named Freight Main Logistics Facilities without any classification.

Nevertheless, each Terminal comprises two types of facilities, since in each one of them the service timetable is different:

- **Technical Facilities (equipment for technical railroad treatment)**
- **Logistic Facilities (equipment for load/downloading and logistic support)**

In the specific card of these Terminals, provision of services timetables are collected in each one of the facilities.

### **2.4 PORTUGAL (INFRAESTRUTURAS DE PORTUGAL)**

In the corresponding railway NS, no classification is considered. Nevertheless and as previously exposed, the main complexes of freight management of the Portuguese railway Network are not regarded as a single terminal, but each specialization area is regarded as a specific Terminal. In some cases, inside the main complexes, public and private management can coexist.

## CHAPTER 3 TERMINAL DETAILS

In all of the networks exists the right of the railway companies to access from the main line to the Terminals infrastructures of Rail Freight Corridor «Atlantic».

The usage of service facilities by DB Netz is governed by the Network Statement for Service Facilities (NSSF). The charging principles can be found in the List of Charges / "Liste der Entgelte für Serviceeinrichtungen", which is available in German.

In the NS of SNCF Réseau and Infraestruturas de Portugal, it is detailed in specific sections related to this access that it is included in the fee for the infrastructure use.

In the ADIF case, this access is regulated through two additional specific services that are complementary to the minimal group of benefits of the infrastructure use. However, ADIF provides this service without cost for the railway companies.

For more information, consult 3.8 of NS and especially NSSF 

For more information, consult 5.2.4 of NS 

For more information, consult 5.3.1 & 6.3.5 of NS 

For more information, consult 5.2.2 of NS 

### 3.1 GERMANY

Terminals and Marshalling Yards belonging to the German territory are enclosed in the following table:

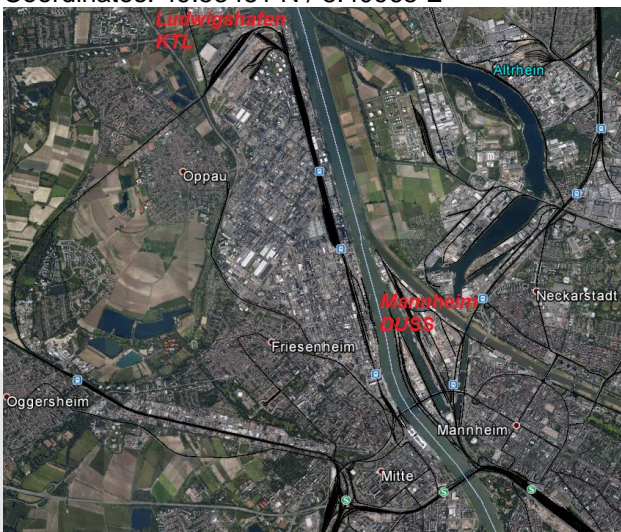

GERMANY	
Terminals	Marshalling Yards
1. Beckingen Puhl Gmbh	1. DUSS Saarbruecken
2. Ludwigshafen KTL	2. Rangierbahnhof Einsiedlerhof
3. Ludwigshafen Contargo	
4. Mannheim Contargo	
5. Mannheim MCT	
6. Mannheim-Handelshafen DUSS	
7. Kirkel Terminal	
8. DP World Germersheim	

In later sections a detailed card of every terminal and marshalling yard is enclosed

## ESTACIÓN DE NOAIN

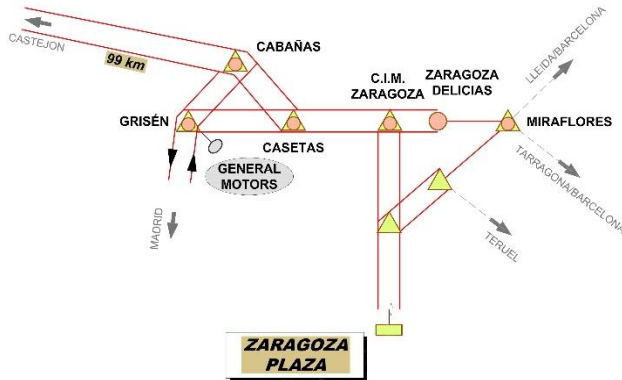

# ZARAGOZA PLAZA TERMINAL

## CHAPTER 1. GENERAL INFORMATION

### 1.1. LOCATION

Position : N 41.403385, W 0.570077

### 1.2. TYPE OF TERMINAL/OWNER

**Freight Terminal**

### 1.3. OPERATION

**Centre Direction**

Adif Serv. Log.  
 Dirección: Noreste  
 Carretera Base Aérea s/n  
 50197 ZARAGOZA  
 Email: [icarpio@adif.es](mailto:icarpio@adif.es)  
 Tlf: +34 93 508 93 39

**Noatum Rail**

(Manipulación de contenedores)

## CHAPTER 2. ACCESS CONDITIONS/WORKING TIMETABLE

**Acceso y expedición de trenes a Instalaciones:**

De Lunes a Viernes y Festivos:

**Horarios servicios: consultar:**

[http://www.adif.es/es\\_ES/infraestructuras/terminales/70805/ficha\\_instalacion\\_logistica\\_0090.shtml](http://www.adif.es/es_ES/infraestructuras/terminales/70805/ficha_instalacion_logistica_0090.shtml)  
**Manipulación de contenedores (Noatum Rail): Horario mínimo:**

- Lunes a Viernes de 7:00 a 20:30 h.
- Para mayor información, consultar: [cgay@noatum.com](mailto:cgay@noatum.com) - Telef: 976764273 D<sup>a</sup> Carolina Gay Guixeras

## CHAPTER 3. INFRASTRUCTURES

**Nº Track - Length (m)**

- 28 vías con longitudes comprendidas entre 370 m y 950 m
- 4 vías de apoyo maniobra de 70 m, 125 m y 194 m
- 2 culatones de locomotoras, 16 m

(Ver esquema en anejo de vías)

## CHAPTER 4. CAPACITY

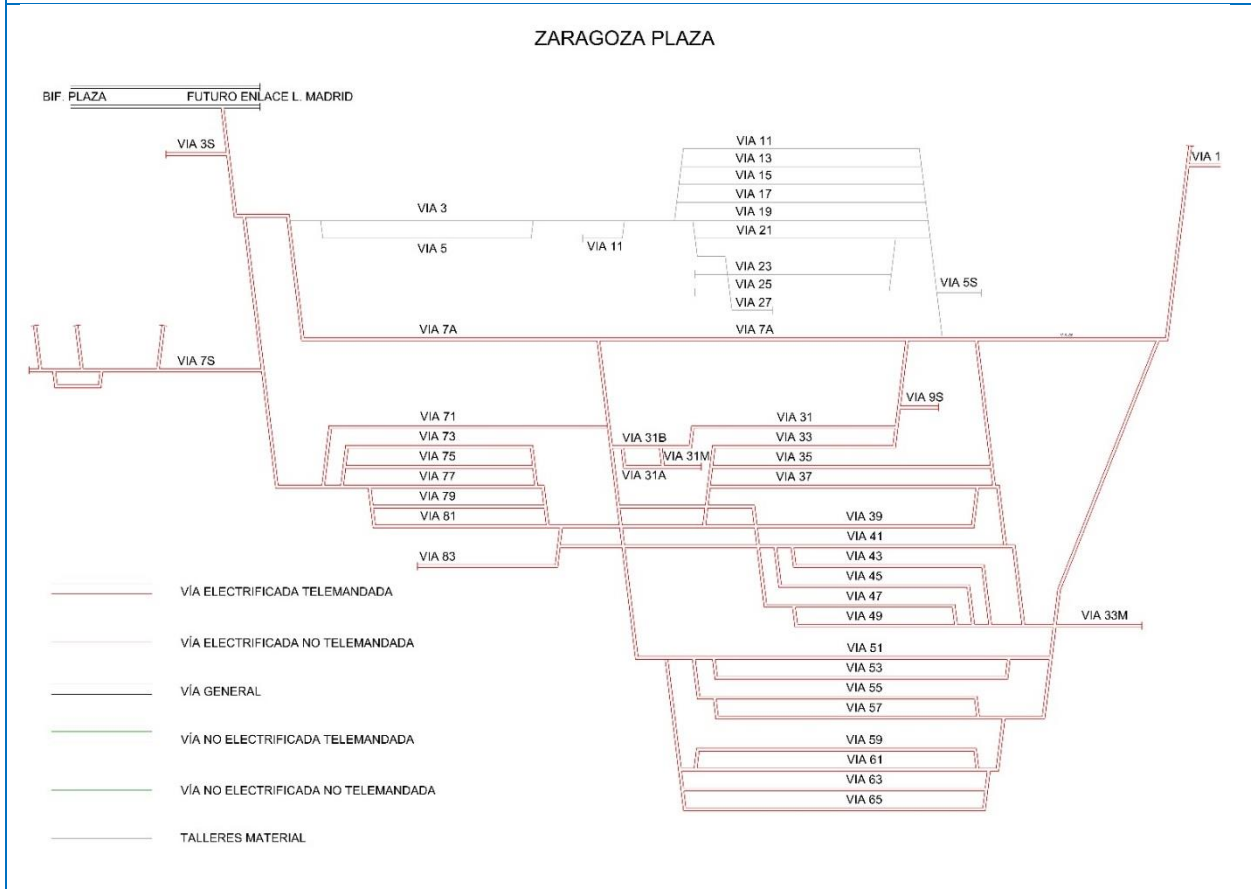

- Please, contact the Terminal for this information

## CHAPTER 5. SERVICES

- Maniobras de entrega y/o recogida en otras Instalaciones.
- Maniobras de formación/selección y en instalaciones con vehículo y sin vehículo de maniobras.
- Operaciones de acceso a Instalaciones exteriores con vehículo y sin vehículo de maniobras
- Operaciones sobre el material en acceso y expedición de trenes.
- Manipulación de contenedores (Noatum Rail).

## EQUIPMENT

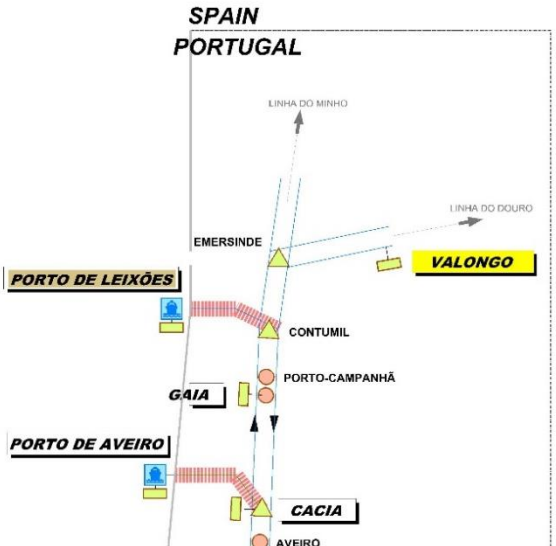

### CP Carga

- Arcade crane of 30 tonnes
- 2 Reach Stacker of 40 tonnes
- 1 stacker of 6 tonnes
- Equipment APDL
- 35 cranes with a capacity between 5 and 240 tonnes
- 3 mobile cranes with a capacity between 40 and 100 tonnes
- 6 dock arcades (STS)
- 13 arcades for storage of containers (RMG)

## INFRASTRUCTURES

# VALONGO TERMINAL

LOCATION	TYPE OF TERMINAL
 <p>The map shows the railway corridor between Porto de Leixões and Porto de Aveiro. Key stations include Emersinde, Contumil, Porto-Campanhã, Gaija, and Cacia. The terminal Valongo is located on the Linha do Douro, which branches off from the main corridor near Emersinde. The map also indicates the proximity to the Spanish border and the Aveiro region.</p>	<p><b>Freight terminal</b></p> <hr/> <p><b>OPERATION</b></p> <p><b>SPC – Terminal Norte</b>  <b>S. Martinho do Campo</b>            Zona Industrial de Campo            Rua da Central, 601            4440-043 Campo, Valongo</p> <p><b>Contact Person: Lucas Teixeira</b>            Tel.: (+351) 224 158 000            Fax: (+351) 224 158 099            E-mail: <a href="mailto:lteixeira@spc.sapec.pt">lteixeira@spc.sapec.pt</a>            E-mail: <a href="mailto:comercial@spc.sapec.pt">comercial@spc.sapec.pt</a></p> <hr/> <p><b>WORKING TIMETABLE</b></p> <ul style="list-style-type: none"> <li>• 8am – 8pm</li> </ul>

## SERVICES

- Area: 18Ha
- Load/unload of Containers
- Container Depot / Terminal capacity: 4500 TUs
- Container Repair (Dry and Reefer)
- 30 refrigerated container availability
- Intermodal railroad-road transfer of ITU (containers, tank-container, and others)
- ITU transfer and parking
- Load reinforcement/decomposition
- Transport
- General freight storage
- Customs Warehouse / Logistics / Road / Railway interface with 40 tonnes crane – 17.000m<sup>2</sup>
- Electrified railway
- Reception and forwarding of compositions (500m)
- Formation / deformation compositions
- Load and unload compositions
- Consolidation / deconsolidation / charge storage
- Handling intermodal UTI'S and other charges
- Paved patio rail (loading and unload area of containers, wood, steel products, roundwood) – 20.000m<sup>2</sup>

## EQUIPMENT:

- •40 tonnes Crane (rail, truck, and warehouse interface)
- •3 Reach stacker – 35 and 45 tonnes
- •2 Fork lift with frontal spreader of 13 tonnes
- •1 railroad shunter locotractor

### INFRASTRUCTURES

# BOBADELA TERMINAL

LOCATION	TYPE OF TERMINAL
 <p>The map illustrates the rail network centered on Bobadela. It shows connections to major hubs like Lisbon (Santa Apolónia, Braço de Prata) and Abrantes. Distances are marked between stations: 28 km to Abrantes, 141 km to Torre das Vagens, 56 km to Bobadela, and 86 km to Vendas Novas. Other nearby stations include Setil, Alcantara, Poceirão, and Pinheiro. The map also indicates the location of the Bobadela terminal relative to the main rail lines.</p>	<p><b>Freight terminal</b></p> <p><b>OPERATION</b></p> <p><b>IP – INFRAESTRUTURAS DE PORTUGAL</b>            Rua Estação de Mercadorias            2695-038 Bobadela            Tel.: (+351) 211 028 811            Fax: (+351) 211 020 248            E-mail:  <a href="mailto:tm.bobadela@infraestruturasdeportugal.pt">tm.bobadela@infraestruturasdeportugal.pt</a>            Site: <a href="http://www.infraestruturasdeportugal.pt">www.infraestruturasdeportugal.pt</a></p> <p><b>CONTEPARQUE</b>            Plataforma da Ribeirinha            Edifício CP Bobadela            Tel.: (+351) 211 020 537/8            Fax: (+351) 211 020 342            E-mail: <a href="mailto:geral@conteparque.com">geral@conteparque.com</a>            Site: <a href="http://www.conteparque.com">www.conteparque.com</a></p> <p><b>SPC – Terminal Multiusos Lisboa-Bobadela</b>            Rua Estação de Mercadorias            2695 Bobadela            Tel.: (+351) 219 534 800            Fax: (+351) 219 534 891            E-mail: <a href="mailto:multiusos@spc.sapec.pt">multiusos@spc.sapec.pt</a>            Site: <a href="http://www.spc.sapec.pt">www.spc.sapec.pt</a></p> <p><b>ALCONT</b>            Lugar Dom Pedro            Instalações da Cavan            Tel.: (+351) 219 587 480            Fax: (+351) 219 587 489            E-mail: <a href="mailto:geral@alcont.pt">geral@alcont.pt</a>            Site: <a href="http://www.alcont.pt">www.alcont.pt</a></p>
